

The BumpItUP Collection

Create a raised image on cardstock
using BumpItUP™ stamps & templates!

11328MC Flying High Clear Stamp Set &
IA-BIU11328 Flying High BumpItUP Template

For project photos and detailed instructions,
please visit our BumpItUP webpage at
www.inkyantics.com/bumpitup.htm

1. Stamp and color images as desired.
2. Place template onto light box with black side facing up. If desired, tape down template to prevent shifting.
3. Turn cardstock so stamped side is facing down. Rub the back with wax paper so your stylus can glide better.
4. Following the color guide, line up corresponding parts of the stamped image with the same section on the template. Trace around the edges of the template design with the stylus, and then lightly rub the stylus in the center of the design to give even more of a raised effect.
5. Repeat for the remaining sections of the color guide, until all parts of the image that you want raised have been dry embossed. Turn over your cardstock, and admire your finished piece!
